Basis of preparation

The condensed consolidated financial statements have been prepared on the basis of historical cost, except for the revaluation of certain non-current assets and financial instruments. Cost is based on the fair values of the consideration given in exchange for assets. All amounts are presented in Australian dollars, unless otherwise noted.

The accounting policies and methods of computation adopted in the preparation of the half-year financial report, are consistent with those adopted and disclosed in the company's annual financial report for the year ended 30 June 2017.

These accounting policies are consistent with Australian Accounting Standards and with International Financial Reporting Standards.

Adoption of new and revised accounting standards

In the half year ended 31 December 2017, the Group has reviewed all of the new and revised Standards and Interpretations issued by the AASB that are relevant to its operations and effective for annual reporting periods beginning on or after 1 July 2017. It has been determined by the Group that, there is no impact, material or otherwise, of the new and revised standards and interpretations on its business and therefore no change is necessary to Group accounting policies.

The Group has also reviewed all new Standards and Interpretations that have been issued but are not yet effective for the half-year ended 31 December 2017. As a result of this review the Directors have determined that there is no impact, material or otherwise, of the new and revised Standards and Interpretations on its business and, therefore, no change necessary to Group accounting policies.

No retrospective change in accounting policy or material reclassification has occurred requiring the inclusion of a third Statement of Financial Position as at the beginning of the comparative financial period, as required under AASB 101.

The half year financial report was approved by the Board of Directors on 13 March 2018.

Note 2 Segment information

The Group has identified its operating segments based on the internal reports that are reviewed and used by the board of directors in assessing performance and determining the allocation of resources. Reportable segments disclosed are based on aggregating operating segments, where the segments have similar characteristics. The Group's sole activity is mineral exploration and resource development wholly within Australia, therefore it has aggregated all operating segments into the one reportable segment being mineral exploration.

The reportable segment is represented by the primary statements forming these financial statements.

Note 12 Newcrest project generation alliance

During the reporting period Encounter entered into a project generation alliance with Newcrest Mining Limited (Newcrest).

Newcrest will fund Encounter up to A\$500,000 over the next 12 months to generate project opportunities within an agreed alliance area in Western Australia ("Alliance Area") to identify new camp scale exploration and potential future production opportunities in northern Western Australia.

Encounter will be the manager of project generation in the Alliance Area. Projects submitted for potential joint venture will be subject to approval prior to any joint venture formation.

The Alliance Area excludes any ground that Newcrest or Encounter currently have a direct or indirect interest in or is under application by Newcrest or Encounter. The Alliance Area also contains an exclusion zone and specifically excludes projects around the Telfer mine in the Paterson Province of WA.

Key terms of the alliance include:

- The companies will enter into a 50:50 joint venture over any project(s) approved for further exploration by both parties to the alliance.
- Encounter will have the option to maintain its 50% contributing interest in approved projects by co-funding its attributable share of exploration expenditure.
- Should Encounter elect not to contribute on a 50:50 basis, Newcrest may increase its interest to 80% by sole funding further exploration activities and delivering a JORC compliant resource of greater than one million ounces of gold or gold equivalent.
- If Newcrest does not elect to increase and maintain its interest to 80% on the terms outlined above then the joint venture over the identified project will terminate and Newcrest's interest will revert back to Encounter, such that Encounter will hold a 100% interest in the project.
- Should the alliance elect not to proceed with a proposed project then that project will revert back to Encounter on a 100% basis.

During the reporting period Encounter received contributions pursuant to the above arrangement from Newcrest of \$383,373 (2016: nil) and incurred acquisition and incurred project expenditure of \$105,201 (2016: nil).
